

TALL FESCUE

Rhizing Moon

Rhizing Moon - A-LIST (IS-TF 305 SEL)

Turf-Type Tall Fescue is a superior tall fescue whether for low maintenance, as it's A-LIST qualification shows, or high maintenance. In addition, it can recover from damage by both rhizomes and aggressive tillering. Under either low or high maintenance. Rhizing Moon demonstrates superior drought tolerance and recovery. Rhizing Moon is a very dark green, fine textured, high density tall fescue with superior performance from the North to the South and East to the West. It shows excellent shade tolerance and high performance in full sun. Superior Brown Patch, Leaf Spot and Pink Snow Mold resistance increases its performance. High levels of endophyte provide resistance to surface feeding insects and contribute to stress tolerance.

Rhizing Moon is recommended permanent turf on sportsfields, lawns, parks and golf courses. It can be cut from 1/2" to 3" and still maintain density and performance. Full sun to shade Rhizing Moon shows high performance. It can be blended with Kentucky bluegrass and other turf species for superior turf.
