

FOXHOUND

Turf Type Tall Fescue

- Very dark green color
- Superior performance in Southeast and high stress environments
- Excellent Brown Patch resistance
- Superb drought tolerance
- Very high wear tolerance
- High endophyte levels

QUICK FACTS: *Foxhound* (IS-TF 284M2) is the best choice when you are hunting for the darkest green turf type tall fescue. Combined with semi-dwarf growth, fine texture, and high density, *Foxhound* provides superior turfgrass quality across a broad range of sites. *Foxhound* shows excellent drought tolerance and also high performance under high temperatures. Excellent Brown Patch resistance contributes to long term survival and superior performance in the Southeast and Transition Zones. *Foxhound* also is very wear tolerant and shows fast recovery from damage. High levels of viable endophyte contribute to insect resistance and improved biotic and abiotic stress tolerance, improved seedling establishment, and reduced weed invasion.

ADAPTATION: *Foxhound* is recommended for permanent turf in full sun to shade in lawns, parks, sports field, sod farms, and golf course roughs. It can be blended with Kentucky bluegrass and other improved turfgrass species and maintained from ½" to 4" It can be overseeded into zoysia for a mix of cool and warm season turf to be used in the transition zone around the globe.

SEEDING RATE: 8 to 10 lbs./1,000 sq. ft.

Turf Quality Under Drought Stress

Logan, UT - 2014 Data

Turfway	7.3
Foxhound	7.2
Fayette	7.0
Raindance	6.3
Falcon IV	6.1
Aquaduct	5.9

LSD @ 5% = 0.5

Genetic Color

All Locations - 2015 Data

Foxhound	7.4
Fayette	7.3
Turfway	7.2
Houndog 8	7.2
Falcon IV	6.7
Marauder	6.5
Aquaduct	6.3

LSD @ 5% = 0.2

Growth Habit	Estab. Rate Days	Mowing Frequency	Traffic Tol. (Brinkman)	Nitrogen Required	Shade Tolerance	Cold Tolerance	Drought Tolerance	Endophyte Enhanced	Salinity Tolerance
Bunch, Upright	Medium 10-15	Weekly	Excellent	Low to Medium	Good	Very Good	Excellent	Yes	High
