

BLUE STAR SPORT

BLUE LINE per lo sport

Blue Star Sport è una miscela di varietà selezionate di Lolium perenne e Poa pratensis ideale per la costituzione di campi sportivi ad uso intensivo.

Si stabilisce rapidamente per fornire una superficie di gioco uniforme e di qualità professionale, con un'eccellente tolleranza all'usura.

CARATTERISTICHE

- Rapido insediamento del manto erboso
- Elevata resistenza alle malattie fungine
- Ottima tolleranza all'usura
- Eccellente colore invernale ed estivo
- Eccellente superficie di gioco

Dose di semina

30 gr/mq

Altezza taglio

2/4 cm

Periodo

da febbraio a novembre

Poa Pratensis Liberator

Perennial ryegrass
Dark green with excellent drought recovery

- Dark green color
- Strong drought recovery
- Early spring greenup
- Excellent turf quality
- Disease resistant

Ratings

Quick facts

Aspire (IS-PR 489) was developed for broad spectrum disease resistance with emphasis on gray leaf spot and helminthosporium.

Attractive dark green colour

It's a dense dark green variety that has demonstrated superior recovery to drought (2010 PR NTEP) and early spring green-up.

Adaptation & use

Aspire was developed for permanent turf-grass blends and mixtures containing improved perennial ryegrass and other grass species compatible with perennial ryegrass.

It is an excellent choice for professional overseeding programs on greens, tees and fairways either as a straight or in mixes and blends.

Performance of ASPIRE in NTEP (USA)

Source: NTEP 2010 sowing 2011 data. Scale 1-9, 9 = best or % recovery

Variety	Mean Grey Leaf Spot	Variety	Percent Recovery After Wear	Variety	Mean Quality Overseeding
Aspire	7,	Aspire	80,	Aspire	7,
Fiesta 4	1	Palmer V	7	Palmer V	9
Palmer V	5,	Pangea GLR	77,	Fiesta 4	7,
	0		0		7
	4,		76,		7,
	6		7		6

Kentucky bluegrass

Superb rust resistance and attractive dark green colour

- Perfect for tall fescue mixtures
- High wear tolerance
- Darker green colour
- Medium-large leaves and density

Ratings

Excellent mixture component

MIRACLE has medium density and the leaves are quite large. This fits very well with many tall fescues and the rather dark leaf colour allows to pick out perfect partners for mixtures in warmer regions. The rather aggressive growth allows also to compete in mixtures with perennial ryegrass.

Very high rust resistance

The high resistance to rusts is very appreciable in *Poa pratensis*. As the species has apomictic behaviour in seed production means that all plants in a variety are almost identical from a genetical point of view and will all show symptoms in case of lack of resistance.

Resilient Ryegrass For High Traffic Use

Pizzazz 2 GLR Turf Type Perennial Ryegrass was selected from maternal progenies of 16 clones, half of which were from the original Pizzazz variety, and half were from an Eastern European collection of extremely grey leaf spot resistant clones.

Pizzazz 2 GLR demonstrates upright growth habit, medium dark green color, and dramatically improved resistance to grey leaf spot, brown patch and stem rust.

Pizzazz 2 GLR is an excellent choice for athletic fields, overseeding and other high traffic applications.

Pizzazz 2 is a Perennial Ryegrass seed ideal for sports turf blends or golf course mixtures or wherever high traffic dictates a more resilient turf.

In an NTEP trial, Pizzazz 2 GLR rated highly for drought tolerance, spring green up and was rated in the top 25% more than 40% of the time.

Additionally, Pizzazz 2 GLR was the top-rated Perennial Ryegrass in "Fall Cover," and was tied for the top rating in "Drought Recovery."

Disease resistance is among the primary features of Pizzazz 2 GLR, with this next generation of Pizzazz possessing improved resistance to:

- Grey Leaf Spot
- Brown Patch
- Stem Rust
- Red Thread

KEY BENEFITS:

- Medium Dark Green Color
- Upright Growth Habit
- Disease Resistant
- Drought-Tolerant

Industry Leaders

TMI develops, produces and markets turf grass seeds for the United States, North America and more than 20 other countries around the world.

Golf courses, sod growers for sod production and landscapers the world over have found TMI's cool season grasses, warm season grasses, golf grass, and specialty grasses to be state of the art when it comes to color, texture, uniformity, disease resistance and overall performance.

Our extensive network of carefully chosen seed growers produces seeds of the highest quality in the world, with high germination rates and purities that exceed official standards. Our certification, testing and quality controls continue to raise the benchmark for the entire industry.
