Perennial ryegrass
Very fine leaved with high shoot density

- Very high shoot density
- Very fine leave texture
- Very high density
- Top quality

Ratings

Top variety of the DLF portfolio

Due to the use and mixture partners the demand to the leaf size may be different.

DICKENS 1 has a very fine needle type leaf texture and in combination with the high shoot density it's the major reason to the harmonic and dense appearance of DICKENS 1.

The very good rating for amenity turf and wear tolerance of the RSM rating speak for themselves and show the superb quality of this variety. If you talk quality turf you can not avoid using DICKENS 1!

Strong creeping red fescue
Maximal Benefit!

- Medium green colour
- Very good disease resistance
- Stress tolerant
- Very nice overall appearance

Ratings

High stress tolerance

Highly stress tolerant variety with an intermediate ranking on RSM as well as on the STRI list.

The disease resistance of MAXIMA 1 is exceptionally good as the results from Bingly show. The figures from RSM underline the flexible use of MAXIMA 1.

It is as good in ornamental turf as in landscape. Thus this variety fits very well in different type of mixtures. You can rely on Maxima as the flexible variety.

Nice Appearance throughout the Whole Year

The general aspect of MAXIMA 1 is very stable over summer as well as in winter and rated good at BSA trials.

Wood meadow grass
 Excellent shade tolerance and winter hardiness

- Superior shade tolerance
- Very winter hardy
- Medium green colour
- Fine-leaved

Ratings

Unique variety for a special segment: Shade!

ENHARY is one of the few varieties of wood meadow grass that can actually be grown for seed in a commercial way.

Characteristics

It is medium green in colour and fine to medium fine leaved in texture. Wood meadowgrass has excellent shade tolerance.

It has a very good winter hardiness. This species does not withstand frequent mowing.

Recommended use

Mixtures for shade caused by trees, buildings etc. with no or infrequent mowing especially with fine fescues, bent grasses, perennial ryegrass and smooth stalked meadowgrass.

Characteristics

Feature	Levels
Establishment	3 - 4 weeks
Soil pH	5.5 - 8.0
Soil type	Most soil types
Seeding rate:	50-70 gr/m ² for shaded areas
Mowing height:	Down to 5,0 cm depending on the shade intensity
Mowing frequency:	Nil to infrequent

Tall fescue A healthy sports type

- High wear tolerance
- Nice dark green color
- Disease infection what is that?
- Fine leaved

Ratings

Well prepared for a sports tackle

A nice high quality turf-type with dark green color. Foxhound delivers all you need in turf tall fescues. In NTEP trials as well as in French turf trials it showed high quality in criteria's like sport performance and wear tolerance.

Always looks nice and vigorous

Outstanding is the infection resistance of Foxhound against all kinds of diseases like brown patch and Pythium or red thread. With high scores in several trials Foxhound staid healthy and took advantage of the nice summer and winter appearance.

Performance in France

Hard fescue Ridu can do!

- Easy to establish.
- Grows well in light, sandy soil.
- Good overall impression.
- High winterhardiness and drought tolerance.

Ratings

Density

Fineness

Red thread tolerance

Salt tolerance

Close mowing tolerance

Description

RIDU produces a dark blue/green fine leaved, low growing turf. It has a quick establishment and a medium-slow growth with an early greening up in spring.

Resistant and Tolerant

RIDU has a good resistance against diseases, a high salt tolerance and a high winterhardiness and drought tolerance. In addition, the shade tolerance is very high.

Use of RIDU

RIDU is recommended in mixtures for less intensive areas like roadsides, banks, and dunes, among others. However, RIDU can also play an important role in shade tolerant mixtures for ornamental purpose.
