

## GREEN STAR SPECIAL

### GREEN LINE a foglia robusta

#### Green Star Special

Dove fossero richieste una minore manutenzione ed un'adeguata tolleranza all'usura, con questa miscela di Lolium perenne e Festuca arundinacea garantiamo entrambi gli obiettivi.

#### CARATTERISTICHE

- Tollerante alla siccità e all'ombra
- Basso esigenze nutrizionali
- Tagli ridotti
- Buona stabilizzazione del suolo
- Produce un manto erboso denso e attraente

**Dose di semina**

40 gr/mq

**Altezza taglio**

4/5 cm

**Periodo**

da febbraio a novembre

**Lolium Perenne Esquire**  
25%

**Lolium Perenne Dickens**  
25%

**Festuca Arundinacea Starlett**  
50%

**Sacco Kg. 10**

## Tall fescue

Take Advantage of the Qualities of Tall Fescue in Turf Mixtures!

- Improved fineness of leaves
- Very high wear tolerance
- Highly adapted in mixtures
- Very rust resistant

## Ratings

## Adaptation in Mixtures

Hardly two summers are identical. Sometimes the drought is prolonged and the growth of tall fescue favoured. On the other hand humid conditions will favour species like perennial ryegrass.

## Such alternating conditions...

can lead to a heterogeneous turf aspect. In our private trials we have remarked the ability of STARLETT to maintain the mixture balance.

## >= 30% in mixtures

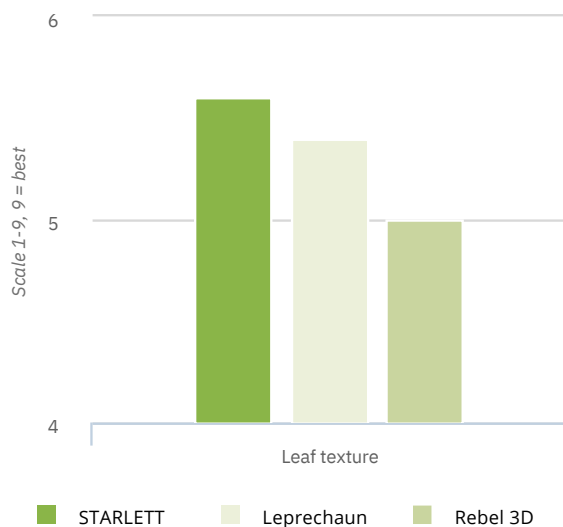

For STARLETT as for other tall fescue varieties we recommend at least 30% (weight) in the seed mixture to ensure a good start facing the more aggressive ryegrass. The perfect partner for tall fescue is *Poa pratensis*.

## Very Rust Resistant

STARLETT is highly disease resistant, in particular towards rusts.

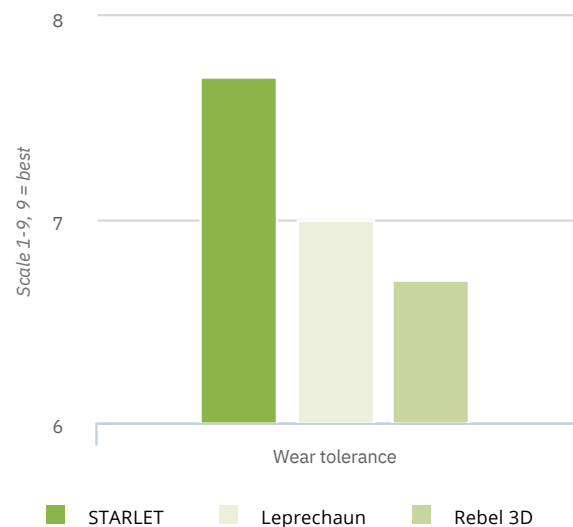

## Leaf texture

## Wear tolerance

Source: NTEP-USA

## Perennial ryegrass Convincing by Performance!

- Dark green colour
- Multi-resistant
- Very fast in establishment
- Combining density and wear tolerance

### Ratings

### Brilliant Future

ESQUIRE is one of the few varieties needing hardly any promotion. Since we started dispatching of seed for private trials we have had a very high positive feedback. Esquire's "field" performance is highly convincing!

### Multi-Resistant

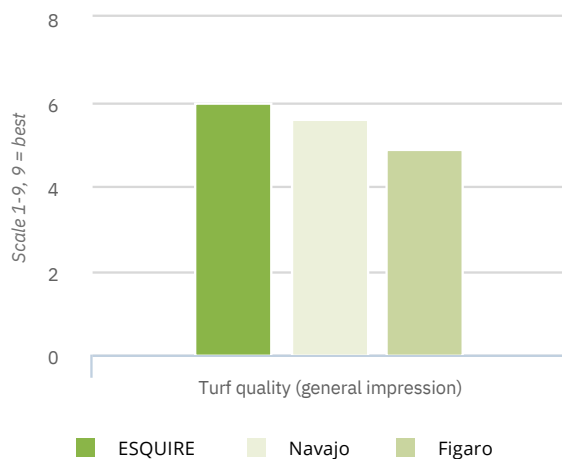

ESQUIRE resists well to winter damage and is tolerant to the majority of diseases of importance in the European Union and in North America; rusts, leaf spot, red thread and dollar spot.

### First Out of Starting-Blocs

ESQUIRE takes off very early in spring with an impressive density. This explains also a very good wear tolerance. This is combined with good summer appearance and leaf fineness above average.

Perennial ryegrass  
Very fine leaved with high shoot density

- Very high shoot density
- Very fine leave texture
- Very high density
- Top quality

## Ratings

## Top variety of the DLF portfolio

Due to the use and mixture partners the demand to the leaf size may be different.

DICKENS 1 has a very fine needle type leaf texture and in combination with the high shoot density it's the major reason to the harmonic and dense appearance of DICKENS 1.

The very good rating for amenity turf and wear tolerance of the RSM rating speak for themselves and show the superb quality of this variety. If you talk quality turf you can not avoid using DICKENS 1!
