

GREEN STAR

GREEN LINE with fine leaves

Green Star produces a sward that is both resistant and attractive.

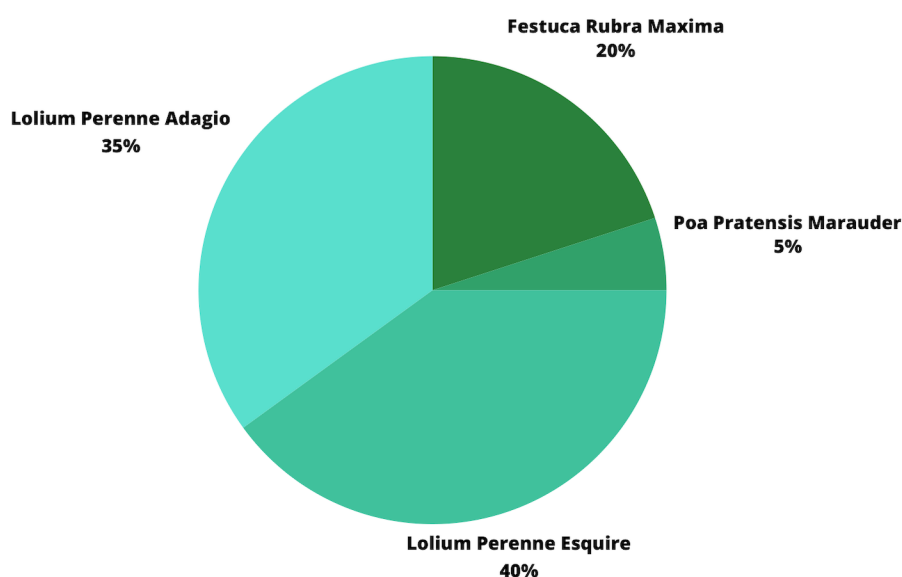

Lolium perenne cultivars alongside fine-leaved Fescue rubra and Poa pratensis allow you to create an excellent lawn or landscaped area all year round.

CHARACTERISTICS

- Dense, fine and attractive turf
- Drought and shade tolerant
- Suitable for a wide range of terrains
- Good look all year round

Seeding rate	30 gr/mq
Cut height	4/5 cm
Period	From February to November

Packaging Kg. 1

Packaging Kg. 3

Packaging Kg. 10

Strong creeping red fescue

Maximal Benefit!

- Medium green colour
- Very good disease resistance
- Stress tolerant
- Very nice overall appearance

Ratings

High stress tolerance

Highly stress tolerant variety with an intermediate ranking on RSM as well as on the STRI list.

The disease resistance of MAXIMA 1 is exceptionally good as the results from Bingly show. The figures from RSM underline the flexible use of MAXIMA 1.

It is as good in ornamental turf as in landscape. Thus this variety fits very well in different type of mixtures. You can rely on Maxima as the flexible variety.

Nice Appearance throughout the Whole Year

The general aspect of MAXIMA 1 is very stable over summer as well as in winter and rated good at BSA trials.

Data from UK

Source: STRI UK (Scores 1-9, 9 = best)

	Shoot density	Visual merit	Mean	Disease resistance
Maxima 1	4,7	4.5	4,6	6

Kentucky Bluegrass

MARAUDER Kentucky bluegrass has incorporated the best traits of its parentage Wildwood Kentucky bluegrass, Baron Kentucky bluegrass, and Shamrock Kentucky bluegrass. This unique combination sets it apart from the competition and ideally suits **MARAUDER** as an excellent addition to your Kentucky bluegrass product line up.

FACTS

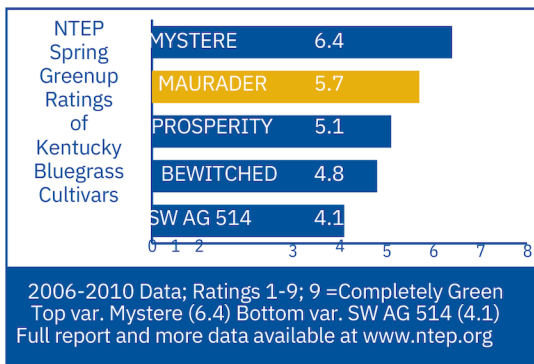

- Early Spring Green Up
- Dark Green Color
- Fine Texture
- Excellent Density
- Good Overall Disease Resistance

APPLICATION

- Residential Lawns
- Commercial Properties
- Sod Production
- Golf Courses

SEEDING RATE

- New Establishment: 3-4 LBS/1000 sq. ft.
- Overseeding: 1-2 LBS/1000 sq. ft.

Perennial ryegrass

Convincing by Performance!

- Dark green colour
- Multi-resistant
- Very fast in establishment
- Combining density and wear tolerance

Ratings

Brilliant Future

ESQUIRE is one of the few varieties needing hardly any promotion. Since we started dispatching of seed for private trials we have had a very high positive feedback. Esquire's "field" performance is highly convincing!

Multi-Resistant

ESQUIRE resists well to winter damage and is tolerant to the majority of diseases of importance in the European Union and in North America; rusts, leaf spot, red thread and dollar spot.

First Out of Starting-Blocs

ESQUIRE takes off very early in spring with an impressive density. This explains also a very good wear tolerance. This is combined with good summer appearance and leaf fineness above average.

[research society for landscape development and landscaping], RSM Rasen [German standard seed mixtures for lawns] 2018 ** Bundessortenamt [Federal Office of Plant Varieties] 2017, descriptive list of lawn grass varieties

A fine leaf and dark green colouration characterise the new variety ADAGIO. A special highlight of this variety is its good to very good suitability for recreational lawns. Especially in public green spaces, varieties with extremely good suitability rating are required for sunbathing lawns, among others. ADAGIO's suitability rating makes it an invaluable component in lawn seed mixtures. ADAGIO is a slow-growing grass – a cost-efficient characteristic when it comes to developing green spaces. In addition, ADAGIO has the ability to strongly suppress weed infestation, which underlines the excellence of this variety.
