

Perennial ryegrass

- Ideal for hard-wearing and recreational lawns
- RSM variety
- Can be used universally
- Ideal leaf fineness and green colouration
- High sward density

[research society for landscape development and landscaping], RSM Rasen [German standard seed mixtures for lawns] 2018 ** Bundessortenamt [Federal Office of Plant Varieties] 2017, descriptive list of lawn grass varieties

A fine leaf and dark green colouration characterise the new variety ADAGIO. A special highlight of this variety is its good to very good suitability for recreational lawns. Especially in public green spaces, varieties with extremely good suitability rating are required for sunbathing lawns, among others. ADAGIO's suitability rating makes it an invaluable component in lawn seed mixtures. ADAGIO is a slow-growing grass – a cost-efficient characteristic when it comes to developing green spaces. In addition, ADAGIO has the ability to strongly suppress weed infestation, which underlines the excellence of this variety.
