

GREEN STAR SPECIAL

GREEN LINE with robust leaves

Green Star Special

Where less maintenance and adequate wear tolerance are required, with this mixture of *Lolium perenne* and *Festuca arundinacea* we guarantee both objectives.

CHARACTERISTICS

- Drought and shade tolerant
- Low nutritional needs
- Reduced cuts
- Good soil stabilization
- Produces a dense, attractive turf

Seeding rate

40 gr/mq

Cut Height

4/5 cm

Period

From February to November

Lolium perenne Greenway
25%

Festuca arundinacea Starlett
50%

Lolium perenne Esquire

Packaging Kg. 10

Tall fescue

Take Advantage of the Qualities of Tall Fescue in Turf Mixtures!

- Improved fineness of leaves
- Very high wear tolerance
- Highly adapted in mixtures
- Very rust resistant

Ratings

Adaptation in Mixtures

Hardly two summers are identical. Sometimes the drought is prolonged and the growth of tall fescue favoured. On the other hand humid conditions will favour species like perennial ryegrass.

Such alternating conditions...

can lead to a heterogeneous turf aspect. In our private trials we have remarked the ability of STARLETT to maintain the mixture balance.

>= 30% in mixtures

For STARLETT as for other tall fescue varieties we recommend at least 30% (weight) in the seed mixture to ensure a good start facing the more aggressive ryegrass. The perfect partner for tall fescue is Poa pratensis.

Very Rust Resistant

STARLETT is highly disease resistant, in particular towards rusts.

Lolium Perenne

- Very best wear tolerance
- Very high shoot density
- Fantastic persistency
- Very high rust resistance

Very Best Wear Tolerance

The very high shoot density combined with the very good recovery of Greenway makes it an obvious choice also for sports areas. Especially the summer wear tolerance is extremely high.

Very High Shoot Density

In the official trials in France Greenway came out as one of the very best varieties with regards of shoot density. This was repeated in the STRI trials in UK.

Outstanding Rust Resistance

Rust attack is one of the servere diseases in perennial ryegrass, but do not worry - Greenway can beat it!

Technical

Specifications

- Perennial ryegrass
- The Natural Way for Greening Up
- Listed/recommended in EU DE DK FR TR UK

Ratings

Scale 1-9, where 9 = best or most pronounced

Ratings

Perennial ryegrass

Convincing by Performance!

- Dark green colour
- Multi-resistant
- Very fast in establishment
- Combining density and wear tolerance

Brilliant Future

ESQUIRE is one of the few varieties needing hardly any promotion. Since we started dispatching of seed for private trials we have had a very high positive feedback. Esquire's "field" performance is highly convincing!

Multi-Resistant

ESQUIRE resists well to winter damage and is tolerant to the majority of diseases of importance in the European Union and in North America; rusts, leaf spot, red thread and dollar spot.

First Out of Starting-Blocs

ESQUIRE takes off very early in spring with an impressive density. This explains also a very good wear tolerance. This is combined with good summer appearance and leaf fineness above average.
