

VERDEFLEX

Tackifier

ABOUT THE PRODUCT

The VERDEFLEX Hydroseeding Tackifier is a product developed by VERDETEC to increase adhesion in conjunction with WOOD FIBER MULCH, where it has the role of fixing the wood fibers between themselves and the layer of fibers to the soil. Furthermore, its function is to increase the water retention capacity in the MULCH and seed germination in Hydroseeding.

FEATURES AND ADVANTAGES

- Increases MULCH's adhesion to the soil.
- Increases fiber-to-fiber adhesion in the MULCH layer.
- Increases the water retention capacity of the MULCH layer applied to the soil.
- Controls dust emission when applied with MULCH to piles.
- Lubricates the hydroseeding mixture allowing better pumping and greater reach.
- Chemically inert product and harmless to the environment.

PHYSICAL PROPERTIES

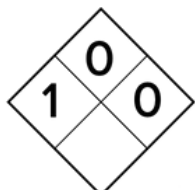

- Appearance: White to off-white granular powder.
- Chemical Composition: Mixture of viscosifying agents; active filler and additives.
- Shelf life: Up to 2 years (store in a dry and cool place).

CONCENTRATIONS RECOMMENDED

5 kg	500 L water
20 kg	2,000 L water
40 kg	4,000 L water
80 kg	8,000 L water

PACKAGING

Packed in 5Kg and 20Kg bags.

**PRODUCT NOT CLASSIFIED AS DANGEROUS
FOR TRANSPORT IN ACCORDANCE WITH
