

GREEN STAR ARUNDINACEA

GREEN LINE a foglia robusta

Green Star Arundinacea produce una cotica erbosa dall'aspetto robusto, resistente alla siccità e all'ombra. L'inclusione di festuca arundinacea, fornisce questi attributi chiave. Green Star Arundinacea è adatta anche per la stabilizzazione del suolo di argini e pendii ripidi, pur rimanendo a bassa manutenzione.

CARATTERISTICHE

- Eccellente tolleranza all'usura
- Buon aspetto per tutto l'anno
- Minori requisiti di nutrienti, irrigazione e manutenzione
- Manto erboso denso e altamente resistente alle malattie
- Eccellente per nuovi impianti anche estensivi

Dose di semina

40 gr/mq

Altezza taglio

4/5 cm

Periodo

da marzo ad ottobre

Kg. 10

TALLADEGA II

Tall Fescue

TALLADEGA II turf type tall fescue was developed for top rated performance in the Transition Zone of the U.S. This variety provides superior density throughout the growing season in all parts of the U.S. due to its aggressive tillering ability which also helps repair damaged areas of turf.

This variety has shown to have great resistance to brown patch in hot humid climates. Other accomplished benefits that **TALLADEGA II** turf type tall fescue offers are very good performance in drought conditions, fine leaf texture, quick establishment, superior resistance to Grey Leaf Spot, and shade tolerance.

When looking for the best in turf type tall fescue, choose **TALLADEGA II** turf type tall fescue for your application use on residential lawns, parks, sod production, sports fields, golf course roughs and commercial properties. **TALLADEGA II** blends well with other tall fescues and mixes with Kentucky bluegrass, perennial ryegrass and hard fescue.

FACTS

- Excellent Traffic Stress
- Improved Summer Activity
- Great Brown Patch Resistance
- Medium Dark Green Color
- Drought Performance
- Superior Density During the Growing Season
- Aggressive Tillering

APPLICATION

- Residential Lawns
- Parks
- Sod Production
- Sports Fields
- Commercial Properties
- Golf Course Roughs

SEEDING RATE

- New Establishment:
8-10 LBS/1000 sq. ft.
- Overseeding:
4-5 LBS/1000 sq. ft.

- Tall fescue**
- Good Color
 - Drought Tolerant
 - Aggressive Tillering
 - Dense Brown Patch and Net Blotch disease resistance
 - Dwarf growth habit
 - Does Great in Low Maintenance Situations

Temple was developed and selected for best performance turf and high seed yields. Temple has a dwarf growth habit and was highly rated in the NTEP Schedule B (Low Maintenance) trial. It also received a high NTEP performance rating in Table 4, Schedule A maintenance. This variety provides superior density throughout the growing season in all parts of the US due to its aggressive tillering ability which also helps repair damaged areas of turf. Temple produces an attractive turf with good genetic color, density, great Brown Patch and Net Blotch disease resistance. These characteristics makes Temple great for many applications like home lawns, parks, sod production, sports fields and commercial properties. Temple is also compatible with other cool-season turfgrasses. If you are looking for a Turf Type Tall Fescue that has a dwarf growth habit Temple is the Tall Fescue for you.

Perennial ryegrass

Very fine leaved with high shoot density

- Very high shoot density
- Very fine leaf texture
- Very high density
- Top quality

Ratings

Top variety of the DLF portfolio

Due to the use and mixture partners the demand to the leaf size may be different.

DICKENS 1 has a very fine needle type leaf texture and in combination with the high shoot density it's the major reason to the harmonic and dense appearance of DICKENS 1.

The very good rating for amenity turf and wear tolerance of the RSM rating speak for themselves and show the superb quality of this variety.

If you talk quality turf you can not avoid using DICKENS 1!
